***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-71 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Reference to SB-T- taxoid compounds it not clearly defined. It is suggested that the compound structures be inserted.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-71 are rejected under 35 U.S.C. 102(b) as being anticipated by Shashoua et al US 5795909.

Shashoua et al teach conjugates of cis-docosahexanoic acid (omega 3 fatty acid) and taxanes used to treat cell proliferative disorders. See claim 7.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-71 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shashoua et al US 5795909.

Shashoua et al teach conjugates of cis-docosahexanoic acid (omega 3 fatty acid) and taxanes used to treat cell proliferative disorders. See, for example, claim 7, and column 7 lines 35 to column 8 line 7 and example 7. Omega 3 fatty acids are known to be combinable with taxanes to produce conjugates; and taxanes are known to treat cell proliferation. Replacement of a compound with another compound belonging to the same class, in this instance taxane and omega 3 fatty acids, is well within the ordinary skill of one in this art as the results, combining a taxane and an omega 3 fatty acid to arrive at a conjugate, would not have been unexpected.

No claim is allowed,
